

Aut viam inveniam aut faciam

(We will either find a way or make one)

Affiliate member of Massachusetts Institute of Technology Energy Initiative

Nov 2008: DCS Energy Savings partners with MIT Energy Initiative.

DCS Energy Savings is proud to announce its association with Massachusetts Institute of Technology Energy Initiative. “This initiative gives our company direct access to the brightest minds on the planet working on energy savings and best way of bringing savings across the globe” said Donal Sugrue, CEO of DCS Energy Savings. “We have a goal of being a leader in helping reduce carbon emissions across the globe. We feel we can achieve this at almost zero cost to the consumer over time through the savings in energy bills, calculation of carbon credits and feedback into energy grids. We have a lofty goal which is why we have partnered with the brightest and best.”

About MITEI: - The MIT Energy Initiative pairs the Institute's world-class research teams with key players across the innovation spectrum to help accomplish two important goals: improving today's energy systems and transforming tomorrow's global energy marketplace.

MITEI is also a resource for policy makers and the public, providing unbiased analysis and serving as an honest broker for industry and government. MITEI's educational offerings combine single-discipline depth with multidiscipline breadth, making our campus an energy learning laboratory. Through research, analysis, and education, MITEI is working to find answers to reinvent our energy world.

About DCS Energy Savings: DCS Energy Savings is a company focused on the provision of next generation energy savings to consumers and businesses across the globe.
